

MUHAMMAD USMAN

FULL STACK DEVELOPER

www.linkedin.com/in/usman-mern-stack-developer | usmanpk16t@gmail.com | <https://usmanspk.vercel.app/>

SUMMARY

Full-stack developer with 2 years of hands-on experience building MERN stack applications and an additional 2 years focused on frontend development using React and Next.js. Experienced in developing and deploying real-world products including SaaS platforms, booking systems, and admin dashboards. Strong at taking features from UI to backend APIs with a focus on performance, scalability, and business needs.

TECHNICAL SKILLS

React.js, Next.js	Redux Toolkit, Context API	MongoDB (Mongoose), GraphQL
JavaScript, TypeScript	REST APIs, JWT Authentication, Axios	LLM API Integration (OpenAI / similar), Prompt Handling
Tailwind CSS, Tanstack Query	Webpack, Vite, Turbopack	

PROFESSIONAL EXPERIENCE

Full Stack Developer – BugDev (Dec 2024 – Present)

- Working on a scalable SaaS product used to manage core company operations and workflows
- Developing and maintaining full-stack features using the MERN stack (React, Node.js, Express, MongoDB)
- Building reusable frontend components, admin dashboards, and role-based access systems
- Designing and integrating REST APIs, handling data flow, validation, and performance optimizations
- Collaborating with team members to ship features, fix production issues, and improve system reliability

Front End Developer – Bezonet (Mar – Dec 2024)

- Worked as a frontend developer on multiple client projects within a large, cross-functional team
- Built responsive and reusable UI components using React, Next.js, and Tailwind CSS
- Converted Figma designs into pixel-accurate, production-ready interfaces

Front End Developer – Loxvo Technologies (Oct 2023 – Feb 2024)

- Implemented designs provided by the team and ensured cross-browser and mobile compatibility
- Coordinated with backend developers to integrate APIs and complete frontend features
- Fixed UI bugs and improved overall frontend performance and usability
- Accurate, production-ready interfaces

EDUCATION

Bachelor in Information Technology - GCUF (2020 - 2024)

- Built two full-stack MERN projects: Book Management System and Doctor-Patient Appointment Booking System with role-based access and admin panels.
- Learned core CS subjects: DSA, OOP, Database Management, Operating Systems, and Statistics & Probability.
